SENDING FULL-CONTENT DATA TO A SECOND DATA PROCESSING SYSTEM
WHILE VIEWING REDUCED-CONTENT DATA ON A FIRST DATA
PROCESSING SYSTEM

ABSTRACT OF THE DISCLOSURE

5 A system, method, and computer program product which allows a user to view and navigate reduced-content web pages on a wireless connection. Upon the user's selection of specific web pages, the pages are then delivered to the user by a less expensive connection, as in a conventional wired internet connection. The delivery is accomplished by several methods, according to different embodiments, including by an electronic mail message, by "push" delivery to an internet-connected data processing system, and by providing a set of hyperlinks to the wired internet connection which reference the selected pages, among other methods. The user is thereby able to view, on a second internet-connected data processing system, the data selected when using the wireless internet-connected data processing system.
